Use Google Drive to Share iPad Videos

This document will show you how to save your video projects to Google Drive and share the folder with your teacher to turn it in.

If you don't already have the Google Drive App, download it from the App Store.

Open it and sign in with your gmail username and password.

Make sure your video project has been saved to the camera roll.

In the Google Drive app, touch the + button to add a file

Then choose "upload photos or videos"

Touch OK

Find your video, touch it, and then touch the check mark.

Now you will see your video on Google Drive. To share with your teacher, touch the i in the corner of your video file.

Touching the **i** makes the details sidebar appear. Touch "share"

Add your teacher's email address and choose which permissions to give your teacher (edit, comment or just view)

Then touch the check mark.

That's it!
